EΦΗΜΕΡΙΣ:

OR, A

DIARY

{ ASTRONOMICAL,
ASTROLOGICAL,
METEOROLOGICAL, }

For the Year of our Lord 1732.

B E I N G

Bissextile or Leap-Year.

Containing,

The Planets Motions and Aspects, Eclipses, Sun's
Rising and Setting, Day-break, Twi-light, Pla-
netary Hour by Day and Night, &c. with a
general Astrological Judgment of the Eclipses,
and of the Sun's Ingress into Aries, &c.

Fitted to the Meridian of London, whose Latit. is 51 d. 32 m.

By J. GADBURY,

Student in Physick and Astrology.

Multi Multa sciunt, sed Nemo Omnia.

LONDON: Printed by Kath. Wilmer, for the
Company of STATIONERS. 1732.

Johannides, R.

**The Vulgar or Common Notes and Move-
able Feasts in the *Julian* and *Gregorian* Calendar, for the
Year 1732.**

*Julian, or English
Account.*

*Gregorian, or Foreign
Account.*

	Golden Number.		
	4		4
	14	Epact.	3
	5	Cycle of the Sun.	
	8	Dominical Letter.	g st
Feb.	20	Shrove-Sunday.	Feb. 24
March	19	Midlent-Sunday.	March 23
April	9	Easter-day.	April 13
May	18	Ascension-day.	May 22
May	28	Whit-Sunday.	June 1
June	4	Trinity-Sunday.	June 8
Dec.	3	Advent-Sunday.	November 30

Note, The Foreign Account is (since the Year 1700) 11 Days before the *English* Account ; so that their 12th day is our 1st, and their 11th our last.

The Times when Marriages are Prohibited.

From *Advent-Sunday* to *Jan. 13.*

From *Septuagesima-Sunday, Feb. 6.* to *Low-Sunday, April 16.*

From *Rogation-Sunday, May 14.* to *Trinity Sunday, June 4.*

The bright resplendent *PLANET VENUS* is an Evening Star to the 12th of *August*, and a Morning Star from thence 'till the Year's end.

**Certain Days prefixed for all Sheriffs, Bayliffs of
Liberties, and other Accomptants, to come to their re-
spective Accompts in the Exchequer.**

January hath XXXI days.

The Derivation of the Names given to the Months.

January is so called (as some say) from Janua a Gate, because it is the entrance into the new Year; but others say, it is so called from Janus, who from his great Wisdom was adorned with two Faces, and fully resembled a person looking back into the old Year, and forward into the new one.

February hath XXXIX days.

It is generally allowed that this Month takes its Name from *Februus*, to purge or cleanse; and if we will allow our selves to follow Christian Derivations rather than Pagan and Heathen, it may probably be, because the Purification of the blessed Virgin *Mary* was in this Month.

Day 13 hours 34 m. long.
 Increased 6 hours.

Mars no sooner turns retrograde, but he meets with an opposition of *Venus*, and afterwards from *Mercury*, both from *Gemini*, while *Jupiter* and *Venus* square each other

On the 15 of this Month, was born the illustrious William Duke of Cumberland, &c. Second Son to his Sacred Majesty King George the Second.
 Day 14 hours 34 m. long.
 Increased 7 hours.

from the first degrees of *Aries* and *Cancer*, the Effects of which will in all likelihood appear, and that very soon.

May hath XXXI days.

This Month is said to be called *May*, a *majoribus populi* Seniors or Elders. Others will have it from *Maia* the Mother of Mercury, to whom it was dedicated: While a third sort say it is so called from *Majus* or *Magnus*, a Name attributed to *Jupiter*, signifying Greatness or Majesty.

The Sun meets with
Quartile from both Saturn and
Jupiter this Month, which 'tis
possible some Statesman may
feel the effect of, but the Sex
tile of Mercury, and the Trine
of Saturn with Venus, shews

The 10 is the longest day,
16 hours 20 min. increased
8 ours 32 min.

The 11 of this Month, 1732,
was his predecessor's death, and
cession to the British throne,
and on the 13th day of the
was his Majesty's King
of Great Britain, &c.

The 11 will be Eclipsed
the 11 of noon, but by reason
of the Moon's Latitude, it
will be an Eclipse where the
Sun is visible.

publick affairs to be in a
peaceable condition.

July hath XXXI days.

July was formerly called *Quintilis*, as being the fifth Month from March, but was since called *July*, in Memory of *Julius Caesar*, the Roman Emperor, who was born on the fourth Ides of this Month, which is the twelfth day according to our Account.

July 1732

In Quarter, the 3 day, at 8 in the evening.

New Moon, the 10 day, at midnight.

the 19 day, at 1 in the morning.

Full moon, the 26 day, at 9 in the morning.

~~Lunar Aspects, 11. 22.~~

Lo. Br.

Observations.

[illegible]

The Sexile of *Jupiter* and *Mercury*, and of the *Sun* and *Jupiter*, brings some Ecclesiastick to deferred Promotion, while the Quarile of *Saturn* and *Mercury*, from *Aries* and *Cancer*, stirs up, and perhaps discovers too, the mischievous Contrivances of discontented persons, who, not contented with seeing examples made of others, push forward till they be made examples themselves.

Day 15 hours 26 m. long.
Decreased 1 hour.

*Felix quem faciunt aliena
pericula Castem.*

G A D B U R Y, 1732.

Of the Eclipses this Year, 1732.

TH E R E will be five Eclipses this Year, three of the Sun, and two of the Moon; they happen in the following Order.

The first will be of the Moon, *May* the 28th, about 2 a-Clock in the Afternoon, and therefore invilible, because the Moon is not then above the Horizon.

The second is of the Sun, the 11th Day of *June* at Noon, but it will be no Eclipse at *London*, because by reason of the Moon's South Latitude, augmented by her Parallax, which is always South to us in North Latitude, the Moon will pass by the Sun on the South Side, without intercepting any Part of his Light; but yet it is very well worth observing, that in the Meridian of *London*, and under the Tropick of *Cancer*, viz. in Latitude 23 Degrees, 30 Minutes North, the Sun will be Eclipsed just at Noon; and in the Zenith, or Vertical Point, or, to be more plain, in the Point directly over their Heads, and this will be near a Place called *Hair*, in *Zaara*, which lies to the Southward of the *Atlas* Mountains in *Africa*.

The third is an Eclipse of the Sun, on the 4th Day of *November*, about 5 in the Afternoon, and therefore invilible, the Sun being then below the Horizon.

The fourth is a great Eclipse of the Moon, Visible, and Total with Continuance; it happens on *Monday* the 20th Day of *November*, according to the following Calculation.

	H.	M.
Beginning <i>November</i> 20.	8	13
Beginning of total Darkness	9	11
True Opposition	9	58
Middle	9	59
End of total Darkness	10	46
End of the Eclipse	11	44
Continuance of total Darkness	1	35
Total Duration	3	31
Digits Eclipsed	20	48

This

G A D B U R Y, 1732.

This Eclipse falls in *Gemini*, the House of *Mercury*, and the Ascendant of *London*: Some great Men, who have private more than publick Interest at Heart, exert their Politicks in pursuing of their own Schemes, while the loyal, publick-spirited Person, is allow'd by all to be most deserving of Success.

The fifth and last Eclipse is of the Sun, *December* the 6th, near 10 before Noon; but by reason of the Moon's North Latitude, the Southermost Limb of the Moon will but just touch the Northermost Limb of the Sun; but in higher North Latitudes, the Eclipse will be greater.

Of the Four Quarters of the Year.

THE Winter Quarter begins with the Sun's Ingress into *Capricorn*, (according to the vulgar, but more properly with the Entrance of the Earth into *Cancer*) which happens *December* the 11th, 1731, at 25 Minutes past 6 in the Morning, at which Time 7 Degrees of *Libra* is upon the Midheaven, and 8 Degrees of *Sagittarius* ascends the Horizon. *Jupiter* Lord thereof, is upon the Cusp of the Midheaven, *Venus* separating from, and *Mercury* and the Sun applying to a Quartile of him, from the Cardinal Sign *Capricorn*, the House of *Saturn*. This gives more than ordinary Uneasiness and Disturbance in Matters of Religion, and it will be well if the Protestants abroad do not feel the Effects of these Configurations, tho' *Jupiter* strong in the Tenth, mitigates the Malevolency of the Influence, and gives us Reason to hope, that the Protestant Powers will not only foresee, but prevent the Jesuitical Practices of *Rome* and her Emissaries, from their unwearied, but unsuccessful Attempts, to subvert the Protestant Religion, and let those Troublers of our *Israel* see the Vanity of their Endeavours.

of

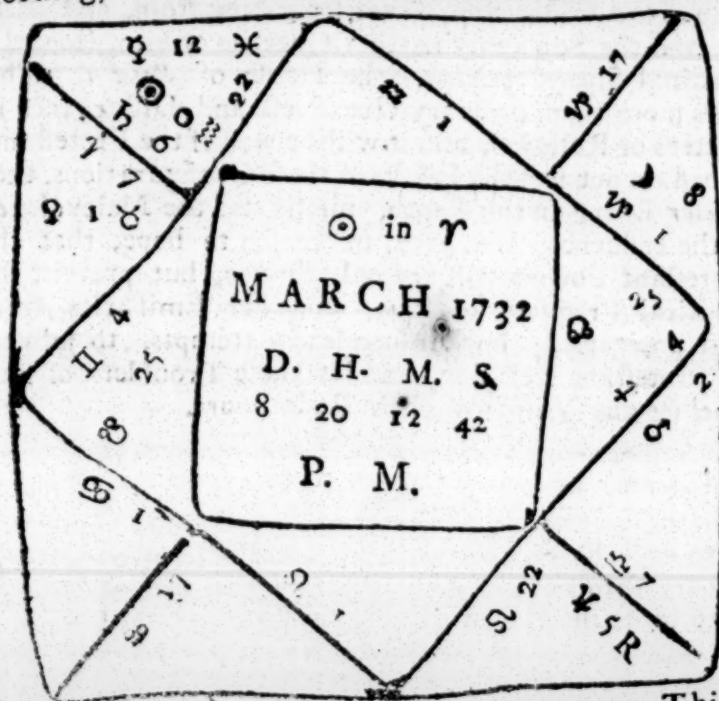

G A D B U R Y, 1732

Of the Spring Quarter.

The Spring Quarter begins when the Sun enters *Aries*, (or rather when the Earth enters *Libra*) which happens this Year on *Thur/day* March the 9th, at 20 Minutes 42 Seconds past 8 in the Morning, according to the following Calculation from Mr. *Leadbetter's* Tables.

Time given.	Sun's Longitude.				Sun's Anomalie			
	S.	D.	M.	S.	S.	D.	M.	S.
Epocha 1732	9	20	13	32	6	11	56	28
March Biff. 8	2	7	1	26	2	7	1	15
Hours 20			49	17			49	17
Min. 20				49				49
Sec. 42				2				2
Mean Long $\odot$	11	28	5	6	8	19	47	51
Equat. add			1	54				
True Long $\odot$	0	0	0	0				

From which subtract 8 Min for the Equation of Time, the true Time is *March* 9, at 12 Min. 42 Sec. past 8 in the Morning, when the Scheme of the Heavens is as follows.

This

G A D B U R Y, 1732.

This Quarter is usher'd in with a remarkable Opposition of the two grand Superiors, *Saturn* and *Jupiter*, which cuts out Work enough for those who have Eyes capable of penetrating into Futurity. Among such, it makes Work for the Pen at Home, while its Influence makes Work for the Sword abroad, calls Armies into the Field, and puts them both in Motion and Action, where it operates; it falls in the Equinoctial Cardinal Signs, *Aries* and *Libra*. This angry Aspect has been long threatening, for in *November* 1730, they came within 6 Degrees of an Opposition in *Virgo* and *Pisces*, and as if it was not to come to pass till they came into Cardinal Signs, *Jupiter* receded, and after his Retrogradation past, he resumes his direct Course, and in the Middle of *October* 1731, they compleat their first Opposition within ore Degree of the Equinoctial, *Jupiter* direct, and *Saturn* Retrograde, till by and by changing their Motions, viz. *Saturn* direct, and *Jupiter* Retrograde, they approach another Opposition, which they compleat within three Days of this present Ingress, and passing on till they alter their Courses again, as at first, viz. *Jupiter* direct, and *Saturn* Retrograde, they compleat their third Opposition about four Days before the Autumnal Equinox, in 15 Degrees of *Aries* and *Libra*.

The Cardinal Sign *Aries*, is look'd upon by Authors to be the Ascendant of *England*, *England's* Enemies seem yet to have Mischief in their Minds, the Religious, or rather Superstitious Jesuits, and their Abettors, have not yet forgot their powerful Way of Preaching and Converting with Fire and Faggot, when they get the suffering Protestants in their Power, their Religious, or rather Sacrilegious War, commonly tending to those violent Methods of converting those whom they please to brand with the Name of *Heretick*.

It is sufficient to put *England* upon her Guard, when her Subjects are not only deem'd *Hereticks*, but have to do with some whose Religion teaches them to think it a Sin to keep Faith with us as such. Those of our Allies, who are firmly attach'd to the Protestant Interest, are so far to be trusted upon a good Foundation; and for the rest,

G A D B U R Y, 1732.

rest, the best Way for us to expect any Good from them, is to keep them out of a Capacity of doing us any Harm, which might be done with much less Difficulty, if trifling Divisions were laid aside, Incendiaries suppress'd, and we united as heartily in Defence of our pure Religion, as our Enemies are against it.

Immediately after this Ingress, and the Opposition of *Saturn* and *Jupiter*, *Jupiter* is opposed by the Sun from *Aries* also, and in a Week more *Jupiter* is opposed by *Mercury* from the same Sign, which further corroborates the malignant Influence of this great Opposition. And if they do not sensibly affect these Kingdoms and Places concern'd, stirring them up to Wars and Tumults, &c. I should think my self somewhat mistaken in my Opinion, as to Planetary Influence, which I have never yet found to pass without their Effects, especially when such extraordinary Configurations happen, and when back'd and corroborated by so many others of the same malevolent Nature.

Of the Summer Quarter.

This Quarter begins when the Sun arrives at the Northern Tropic, which is this Year, *June* 10, at 32 Minutes past 7 in the Morning, at which Time 25 Degrees of *Aries* is upon the Midheaven, and three of *Leo* ascends. The Sun Lord of the Ascendant, meets (immediately after the Ingress) with a Quartile of *Jupiter*, and soon after that with a Quartile of *Saturn*. This, with the Quartile of *Mars* and *Venus*, gives Reason to fear that the Affairs of Places more immediately influenced, are in a disturb'd, unsettled Condition. *Spain* is yet dissatisfy'd; and if *France* prove honest and faithful, it may tend to the further confirming the Peace and Tranquillity of *England*, and perhaps of all *Europe*.

Of the Autumn, or Harvest Quarter.

This Quarter begins with the Sun's Entrance into *Libra*, which is this Year *September* 11, at 36 Minutes past 8 at Night, and is also usher'd in with an Opposition of *Saturn* and *Jupiter*, and other malevolent Aspects; but my Limits will not permit me to enlarge; but the Curious need but look a little back, and they will find a like repeated Opposition of *Saturn* and *Jupiter*, viz. in *February*, and *September* 1713, and in *January* 1714, and consider

G A D B U R Y, 1732.

consider what succeeded it not only abroad, but even in our own Nation, as the Rebellion at *Preston* in 1715, and the severe Frost that Winter, &c. and they may give a probable Conjecture (if like Causes produce like Effects) as to the Influence of this repeated Opposition and its Attendants.

What is this Sound, that seems to come from far ;

Is Europe still involving in a War ?

Look there the Men of War are going out,

See here they're beating for a fresh Recruit :

O're yonder Flood my Eye a Flag discerns,

Not always Peace, but sounds to Arms to Arms.

F I N I S.

To Masters of Ships, Country Shop-keepers, &c. this Publick Notice is given,

That WILLIAM DICEY, in conjunction with Mr. BENJAMIN OKELL (to whom a Royal Patent is granted) THOMAS COBB (in Right of ELIZABETH his Wife, late Widow of Mr. CLUER) and ROBERT RAIKES, continue, and jointly carry on the preparing and vending, both Whole-

sale and Retale, that excellent Medicine, call'd Dr. BATEMAN's PECTORAL DROPS, at their Warehouse against the South-Door of Bow-Church, at the farther End of the Church-yard from Cheap-side, London ; at which Place, (and no other in the City of London) Retailers may be furnished, with good Allowance for Profit, by directing or sending to WILLIAM DICEY, or THOMAS COBB and Company, at the Warehouse aforesaid.

Note, You are desired to observe, That this is the Old accustomed Warehouse, whence all Retale Traders from London were served with the above-mentioned Drops in the Life-time of the late Mr. JOHN CLUER.

* * John Holloway, Son of John Holloway, Miller, of Chatlington, within two Miles of Chippen-Norton, in the County of Oxford, was long troubled with the Rheumatism and violent Pains in his Stomach, and in a very small Time recovered both Health and Strength, in taking about five Bottles, which cost only Five Shillings.

A D V E R T I S E M E N T.

Just Publish'd,

WIT *Musically Embellish'd*: Being a Collection of Forty *English* Ballads. The Words and Tunes entirely New, Set to Musick (with a Thorough Bass for the Harpsicord) by Mr. *John Frederick Lampe*, of the Opera-House, and the Tunes all Transpos'd for the Flute. *Price* Five Shillings. To make this Work the more Universal, the Whole is divided into five equal Parts, at *One Shilling* each Book. These Songs afford a double Advantage; the Airs being so contriv'd to make agreeable Lessons for the Harpsicord, and the Words, even without the Musick, make a diverting Miscellany of Poems. Engrav'd, Printed and Sold by *T. Cobb*, (who married the Widow of Mr. *John Cluer*,) at the Printing-Office in *Bow Church-Yard*, London.

Where may be had, The Third Edition of

The Modern Musick-Master; Or, *The Universal Musician*: Consisting of Instructions to Singing, and Directions to play on the Common Flute, *German* Flute, Hautboy, Violin, Harpsicord, or Organ; with a Brief History of Musick to this present Time, in which Volume is included many other valuable Pieces. Engrav'd on above Three Hundred and Twenty Plates. *Price* Seven Shillings and Six-pence. Also,

Books of Instructions for any single Instrument. *Price* One Shilling Six-pence.

Likewise at the above Printing-Office, there is just Publish'd,

A Curious Miscellany of Select Fables, and other short Poems, &c. for the Amusement of young Gentlemen and Ladies. To which are added, The Alphabets of the most Useful and Ornamental Hands, for their Improvement in the Art of Writing. The whole finely Engrav'd on Thirty-two Copper Plates. *Price* One Shilling Six-pence. As also,

Youth's Instructor in the Art of Numbers: Being a New Cyphering Book, in which is shewn Variety of Penmanship, and Command of Hand, finely Engrav'd on Copper Plates, (for the Use of Schools) by *George Bickham*, being the Best of the Kind ever yet extant. *Price* One Shilling Six-pence, with good Allowance to School-Masters.
